

W.W. Williams Expands California Footprint with Acquisition of Valley Power Systems

Strategic transaction adds Allison Transmission distribution, power generation, and industrial field service capabilities across key California markets

Grapevine, TX — Thursday, March 12th 2026, W.W. Williams, one of the nation’s leading multi-line engine, transmission, and power generation distributors, today announced the acquisition of Valley Power Systems, Inc., with operations spanning across California.

The transaction accelerates W.W. Williams’ strategic expansion in the California market and reinforces its position as a premier full-service provider across on-highway, off-highway, and power generation segments. Valley Power Systems has served the California market for decades as an authorized OEM distributor and multi-line service provider.

“This acquisition is a defining moment in our California strategy. Valley Power Systems established OEM relationships, its power generation expertise, and its loyal customer base in some of the state’s most active industrial corridors to give us an immediate and meaningful presence.”

— Marc Buncher, President & CEO W.W. Williams

About Valley Power Systems

Valley Power Systems is a factory authorized power solutions provider for some of the most recognized engine and equipment manufacturers in the world, including Allison Transmission, Atlas Copco, Blue Star Power Systems, Detroit Diesel, DEUTZ, Isuzu Diesel, Mercedes-Benz, Northern Lights, Us Motors and ValleyBuilt™, our new line of rebuilt Allison Transmissions.
